CONTENTS OF VOL. XII. (Nos. 45–48)

NUMBER 45—JANUARY

Oxidation of Metals. By A. U. Seybolt, General Electric Research Laboratory, Schenectady, New York 1

The Physical Theory of Rock Magnetism. By F. D. Stacey, Gassiot Fellow in Geomagnetism, Meteorological Office Research Unit, Huntingdon Road, Cambridge 45

NUMBER 46—APRIL

The Electrical Properties of Dislocations in Semiconductors. By R. M. Broudy, Parma Research Laboratory, Union Carbide Corporation, Parma 30, Ohio 135

Investigations in Relativistic Cosmology. By E. M. Lifshitz and I. M. Khalatnikov, Institute for Physical Problems, Academy of Sciences, Moscow, U.S.S.R. 185

NUMBER 47—JULY

Anelasticity and Stress-induced Ordering of Point Defects in Crystals. By A. S. Nowick and W. R. Heller, Thomas J. Watson Research Center, International Business Machines Corp., Yorktown Heights, N.Y., U.S.A. 251

The Properties of the Helium Atom and the Two-electron Systems. By A. L. Stewart, Department of Applied Mathematics, The Queen's University of Belfast 299

NUMBER 48—OCTOBER

Characteristic Energy Losses of Electrons in Solids. By O. Klemperer and J. P. G. Shepherd, Imperial College of Science and Technology, University of London 355

Singularities in First-order Phase Transitions. By Shigetoshi Katsura, Department of Chemistry, University of Oregon, Eugene, Oregon 391

The Lattice Dynamics of an Anharmonic Crystal. By R. A. Cowley, Crystallographic Laboratory, Cambridge 421
